

## List of Contents

### NUMBER 1

- Terry E. Shoup i Happy Birthday *Mechanism and Machine Theory* and Happy Birthday IFToMM
- G. Bianchi and L. Püst ii Twenty years of IFToMM
- v Obituary
- C. G. Gibson and K. H. Hunt 1 Geometry of screw systems—1. Screws: genesis and geometry
- C. G. Gibson and K. H. Hunt 11 Geometry of screw systems—2. Classification of screw systems
- R. Karmakar and A. Mukherjee 29 Dynamics of electric overhead travelling cranes. A bond graph approach
- J. P. Sadler and Zhijia Yang 41 Optimal design of cam-linkage mechanisms for dynamic-force characteristics
- M. N. Ambardekar and K. N. Gupta 59 Stochastic optimal control of vibrations of a high-speed cam-driven mechanism
- J. M. Castelain and D. Bernier 69 A new program based on the hypercomplex theory for automatic generation of the direct differential model of robot manipulators
- Youngil Youm and T. C. Huang 85 Exact displacement analysis of XCCC spatial mechanisms by the direction cosine matrix method
- Ralph Akhras and Jorge Angeles 97 Unconstrained nonlinear least-square optimization of planar linkages for rigid-body guidance
- J. N. Bricout, J. C. Debus and P. Micheau 119 A finite element model for the dynamics of flexible manipulators
- Buchbesprechung (Book Review)*
- H. Gläser 129 Theorie Technischer Systeme. Eine vollständige Theorie für die technische Konstruktion (Theory of Technical Systems. A Total Concept Theory for Engineering Design). Von V. Hubka und W. E. Eder
- Software Survey Section I

### NUMBER 2

- Osman Gürsoy 131 The dual angle of pitch of a closed ruled surface
- George N. Sandor, Yongxian Xu and Tzu-Chen Weng 141 A graphical method for solving the Euler-Savary equation

<b>S. N. Kolpashnikov and I. B. Chelpanov</b>	149	Calculation and design principles of high-speed robot grippers
<b>Rafael Kelly</b>	161	Adaptive computed torque plus compensation control for robot manipulators
<b>H. B. Wang and Z. Huang</b>	167	Kinematic influence coefficient method of kinematic and dynamic analysis
<b>Johann Lang</b>	175	Über Charakteristiktangenten von Hüllflächen
<b>Gao Feng</b>	183	Complete shaking force and shaking moment balancing of 26 types of four-, five- and six-bar linkages with prismatic pairs
<b>A. Cardona and M. Geradin</b>	193	Modeling of a hydraulic actuator in flexible machine dynamics simulation
<b>S. Nagarajan and David A. Turcic</b>	209	General methods of determining stability and critical speeds for elastic mechanism systems
<b>A. Daadbin</b>	225	Static and dynamic analysis of knuckle shape threaded joints
<b>J. Rastegar and B. Fardanesh</b>	233	Manipulator workspace analysis using the Monte Carlo method
<i>Book Review</i> <b>H. Gründemann</b>	241	Transforming Domain into Boundary Integrals in BEM, Lecture Notes in Engineering, Vol. 35. By W. Tang
<i>Software Survey Section</i>	I	
<i>New Patents</i>	V	

#### NUMBER 3

### **DESIGN THEORIES: APPLICATIONS TO MECHANISM AND MACHINE DESIGN**

<b>Kurt M. Marshek and Srikanth M. Kannapan</b>	v	Preface
<b>M. S. Hundal</b>	243	A systematic method for developing function structures, solutions and concept variants
<b>Eric Sandgren</b>	257	A multi-objective design tree approach for the optimization of mechanisms
<b>Farrokh Mistree, Douglas Muster, Sridharan Srinivasan and Sangram Mudali</b>	273	Design of linkages: a conceptual exercise in designing for concept

<b>Pramod Jain and Alice M. Agogino</b>	287 Theory of design: an optimization perspective
<b>Kristin L. Wood and Erik K. Antonsson</b>	305 Modeling imprecision and uncertainty in preliminary engineering design
<b>Koichi Kurumatani, Tetsuo Tomiyama and Hiroyuki Yoshikawa</b>	325 Qualitative representation of machine behaviors for intelligent CAD systems
<b>Srikanth M. Kannapan and Kurt M. Marshek</b>	335 An algebraic and predicate logic approach to representation and reasoning in machine design
<b>Atsushi Nakamura and Naomasa Nakajima</b>	355 Computer-aided design diagnosis for machines—kinematic model extraction from mechanisms
<b>Mark R. Cutkosky and Jay M. Tenenbaum</b>	365 A methodology and computational framework for concurrent product and process design
<b>Michael R. Duffey and John R. Dixon</b>	383 A program of research in mechanical design: computer-based models and representations
<i>Software Survey Section</i>	I

#### NUMBER 4

<b>Jürgen Jakoby</b>	i Professor Dr.-Ing. Franz Josef Gierse, 60 Jahre
<b>Jürgen Jakoby</b>	397 Ikonische Darstellung von Mechanismen und Getrieben
<b>Milan D. Djurovic and Miomir K. Vukobratovic</b>	407 A contribution to dynamic modeling of cooperative manipulation
<b>Wen Yeuan Chung and C. H. Chiang</b>	417 Fourth-order synthesis of Watt-II six-bar function generators
<b>A. J. Koivo and M. A. Unseren</b>	427 Modeling closed chain motion of two manipulators holding a rigid object
<b>T. S. Liu and S. Y. Tsay</b>	439 Singularity of robotic kinematics: a differential motion approach
<b>A. I. Dobrolyubov</b>	449 Stepping wave mechanisms
<b>I. S. Kochev</b>	459 Full shaking moment balancing of planar linkages by a prescribed input speed fluctuation
<b>I. S. Kochev</b>	467 Theory of symmetrical mechanisms
<i>Software Survey Section</i>	I
<i>New Patents</i>	V

## NUMBER 5

- Asen Yotov Daskalov** 479 Kinematic analysis of cardan drives
- D. C. H. Yang and J. G. Blanche** 487 Design and application guidelines for cycloid drives with machining tolerances
- V. S. Karelín** 503 The asymmetry of the  $3R$  plane structural group and its containing mechanisms
- G. Stépán, A. Steven and L. Maudner** 515 Design principles of digitally controlled robots
- James K. Mills** 529 Stability and robustness of a high gain nonlinear robot manipulator controller
- Bogdan Posiadala, Bogdan Skalmierski and Lech Tomski** 547 Motion of the lifted load brought by a kinematic forcing of the crane telescopic boom
- Zhonghe Ye and M. R. Smith** 557 A new equation for the critical frame length in the three-gear drive
- Jae Uk Kim and Byung Man Kwak** 563 Application of edge permutation group to structural synthesis of epicyclic gear trains
- Ming J. Tsai and Yee H. Chiou** 575 Manipulability of manipulators
- Book Reviews*
- Z. S. Roth** 587 Machines that Walk: The Adaptive Suspension Vehicle. By Shin-Min Song and Kenneth J. Waldron
- Aynur Ünal** 587 Vibration Diagnostics in Precision Instruments. By S. Korablev, V. Shapin and Y. Filatov
- H. Gläser** 588 Gelenke und Gelenkwellen. Von F. Schmelz, H.-Ch. v. Scherr-Thon und E. Aucktor
- Software Survey Section* I
- New Patents* V

## NUMBER 6

### i Obituary

- K. S. H. Sadek, J. L. Lloyd and M. R. Smith** 589 A new design of Geneva drive to reduce shock loading
- Jarosław Stryczek** 597 Projektieren der Zykloidenverzahnungen hydraulischer Verdrängermaschinen
- Carlo Innocenti and Vincenzo Parenti-Castelli** 611 Direct position analysis of the Stewart platform mechanism

<b>C. A. Rogers, H. H. Mabie and C. F. Reinholtz</b>	623	Design of spur gears generated with pinion cutters
<b>H. H. Mabie, C. A. Rogers and C. F. Reinholtz</b>	635	Design of nonstandard spur gears cut by a hob
<b>Li Shujun</b>	645	Computer-aided structure synthesis of spatial kinematic chains
<b>B. Heimann and H. Loose</b>	655	Treatment of kinematic constraints of multirigid body system dynamics and their application to manipulation-robots
<b>Hyunsoo Kim and Kurt M. Marshek</b>	667	Force distribution for a flat belt drive with a concentrated contact load
<b>I. S. Kochev</b>	679	General method for active balancing of combined shaking moment and torque fluctuations in planar linkages
<b>J. A. Parkin</b>	689	Co-ordinate transformations of screws with applications to screw systems and finite twists
